-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 6) ☐ Other: _____.

1. Applicant's amendment filed 3/18/04 has been entered. Due to applicant's response and traverse of the previous restriction requirement, the examiner is withdrawing the restriction requirement. Claims 1-17 will be examined.

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-6,9,11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Judd et al 5,046,841. Judd discloses a coin (col 4 line 22) that has either a radial

Art Unit: 2876

or annular configured diffraction grating (figs 3,5; col 2 line 63) for individual identification of a coin. There is disclosed a means for illuminating and reading the grating with a plurality of light sensing devices 706. Juds does not disclose specifically that the coin is metal or the plastic coating thereof. However, metal coins are old and well known as is it old and well known to plastic coat metal tokens (such as gaming chips). It would have been obvious to one of ordinary skill in the art to make the coin of Juds with metal for the durability and resistance to bending of metal and would be obvious to coat the metal coin with plastic in order to protect the surface and diffraction gratings on the coin from excessive abrasion.

6. Claims 7,8,10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or fairly suggest to one of ordinary skill in the art the coin tester for testing the specific coin of claim 1.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Phillips 5,881,196 discloses an optically encoded coin.
